

CSCI 360
Seminar on Computing and Society
Spring 2010
Bowring

Guidelines for paired student presentations and debates:

Each pair of students will jointly prepare to present key issues in the assigned readings, using additional materials as needed. The pair will also choose a specific related topic for a debate between themselves that they will argue in class following their presentation. After the the debaters finish, the other students will question them further with the goal of declaring a winner and having a lively discussion!

Deliverable: (at a minimum)

[last1_last2].debate.pdf

Summary of your presentation, including references

Debate: Statement of purpose or policy and who takes pro / con
