

Academy Award-winning alumnus returns to campus

Nafees Bin Zafar

2008 Academy Award-winning visual effects engineer and 1998 College of Charleston graduate will speak about the nexus of computational thinking and the creative arts.

As part of Digital Domain, Bin Zafar has created special effects for:

- > "Pirates of the Caribbean: At World's End"
- > "The Day After Tomorrow"
- > "Lord of the Rings: Fellowship of the Ring"
- > "Flags of Our Fathers"
- > "The Stealth"

October 15, 2009

5:00 p.m.

Free Admission

Physicians Memorial Auditorium

College of Charleston

843.953.6905 or creativity@cs.cofc.edu

#csatcofc

This talk is part of the Computing Outreach Lecture Series, which is sponsored by the Department of Computer Science and the student chapter of the Association for Computing Machinery (ACM). Mr. Zafar's appearance is also made possible by PMI Charleston (www.pmi-charleston.org) and PM One (www.pmone.net), two firms that are advancing the effectiveness of project management in the Lowcountry.
