CSIS 602
Fall 2007
Dr. Jim Bowring

Paper # 2

Due 10 October 2007

Chapters 6-10 deal with various aspects of software systems **requirements**. You are to select an area of interest to you from within these chapters and research it in more detail. A good starting point is the suggested readings at the end of each chapter. Further resources are conference proceedings and journals found online at ACM and IEEE-CS, as well as the Library and the Software Engineering Institute (SEI) and the SWEBOK. You will present a critical analysis of the topic, not just a survey paper, including a convincing presentation of your thesis. Refer to the reading "How to Read a Research Paper." Do not use magazine articles and Wikipedia-like references. A required element of the paper is an exploration of the ethical aspects of the chosen topic. You may be asked to give an oral presentation of your work of 5 to 10 minutes in length on the date it is due, so be prepared!

Deliverable
      Submitted in PDF format, except the presentation slides
      Term paper will be at least 2,500 words plus references.
      Term paper format will be as specified here:
            http://www.acm.org/sigs/pubs/proceed/template.html
      Oral presentation will be 5-10 minutes in length
