# Individual Assignment

Name: Guilherme Vale Ferreira Menezes
Software Architecture & Design
Professor: Jim Bowring
College of Charleston
January 17 2007

As in the book

Corrected

Corrections:
1. Merge node inserted
2. Initial node inserted
3. Guard "Else" inserted
4. Parameter type specified

Note: Execution of "Cut molding" only starts when both tokens arrive at its inputs. Both the initial node and the input parameter produce tokens on the beginning of the execution of the activity.
